

Claims

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

- 1           1. A storage device for storing articles comprising: a base layer  
2     incorporating activated carbon wherein the carbon absorbs odors of the  
3     articles stored inside the storage device.
- 1           2. A storage device according to claim 1 wherein the storage  
2     device comprises a backpack.
- 1           3. A storage device according to claim 2 wherein the base layer  
2     is air permeable.
- 1           4. A storage device according to claim 2 wherein the base layer  
2     has an outer surface and further comprising a camouflage color scheme  
3     provided on the outer surface of the base layer, the camouflage color  
4     scheme reducing the chances of visible detection of the storage device by  
5     wildlife.
- 1           5. A storage device according to claim 2 wherein the base layer  
2     has an outer surface and further comprising a highly visible color scheme  
3     provided on the outer surface of the base layer, the highly visible color  
4     scheme increasing the chances of visible detection of the storage device  
5     by humans.
- 1           6. A storage device according to claim 1 wherein the storage  
2     device comprises a fanny pack.
- 1           7. A storage device according to claim 6 wherein the base layer  
2     is air permeable.

10050203-011602

1           8.     A storage device according to claim 6 wherein the base layer  
2     has an outer surface and further comprising a camouflage color scheme  
3     provided on the outer surface of the base layer, the camouflage color  
4     scheme reducing the chances of visible detection of the storage device by  
5     wildlife.

1           9.     A storage device according to claim 6 wherein the base layer  
2     has an outer surface and further comprising a highly visible color scheme  
3     provided on the outer surface of the base layer, the highly visible color  
4     scheme increasing the chances of visible detection of the storage device  
5     by humans.

1           10.    A storage device according to claim 1 wherein the storage  
2     device comprises a duffel.

1           11.    A storage device according to claim 10 wherein the base  
2     layer is air permeable.

1           12.    A storage device according to claim 10 wherein the base  
2     layer has an outer surface and further comprising a camouflage color  
3     scheme provided on the outer surface of the base layer, the camouflage  
4     color scheme reducing the chances of visible detection of the storage  
5     device by wildlife.

1           13.    A storage device according to claim 10 wherein the base  
2     layer has an outer surface and further comprising a highly visible color  
3     scheme provided on the outer surface of the base layer, the highly visible  
4     color scheme increasing the chances of visible detection of the storage  
5     device by humans.

1           14.    A storage device according to claim 1 wherein the activated  
2     carbon is provided in the range of 5 g/m<sup>2</sup> to 120 g/m<sup>2</sup>.

1           15. A storage device according to claim 1 wherein the activated  
2 carbon is impregnated in the base layer.

1           16. A storage device according to claim 1 and further comprising  
2 an outer layer mounted to the base layer.

1           17. A storage device according to claim 16 wherein the base  
2 layer has an inner surface and the outer layer has an outer surface, the  
3 activated carbon being provided intermediate the inner surface and the  
4 outer surface.

1           18. A storage device according to claim 1 wherein the base layer  
2 has an inner surface and an outer surface, the activated carbon being  
3 provided intermediate the inner surface and outer surface.

1           19. A duffel bag intended for storage of articles comprising a  
2 base layer incorporating an odor absorbing agent for absorbing odors of  
3 the articles stored in the duffel bag.

1           20. A duffel bag according to claim 19 wherein the odor  
2 absorbing agent is activated carbon.

1           21. A duffel bag according to claim 20 wherein the activated  
2 carbon is provided in the range of 5 g/m<sup>2</sup> to 120 g/m<sup>2</sup>.

1           22. A duffel bag according to claim 20 wherein the base layer  
2 has an outer surface and further comprising a camouflage color scheme  
3 provided on the outer surface of the base layer, the camouflage color  
4 scheme reducing the chances of visible detection of the duffel bag by  
5 wildlife.

1           23. A duffel bag according to claim 20 wherein the base layer  
2 has an outer surface and further comprising a highly visible color scheme

3 provided on the outer surface of the base layer, the highly visible color  
4 scheme increasing the chances of visible detection of the duffel bag by  
5 humans.

1 24. A duffel bag according to claim 20 wherein the activated  
2 carbon is impregnated in the base layer.

1 25. A duffel bag according to claim 20 and further comprising an  
2 outer layer mounted to the base layer.

1 26. A duffel bag according to claim 25 wherein the base layer  
2 has an inner surface and the outer layer has an outer surface, the  
3 activated carbon being provided intermediate the inner surface and the  
4 outer surface.

1 27. A duffel bag according to claim 26 and further comprising a  
2 camouflage color scheme provided on the outer surface of the outer layer,  
3 the camouflage color scheme reducing the chances of visible detection of  
4 the duffel bag by wildlife.

1 28. A duffel bag according to claim 26 and further comprising a  
2 highly visible color scheme provided on the outer surface of the outer  
3 layer, the highly visible color scheme increasing the chances of visible  
4 detection of the duffel bag by humans.

1 29. A backpack intended for storage of articles comprising a  
2 base layer incorporating an odor absorbing agent provided for absorbing  
3 odors of the articles stored in the backpack.

1 30. A backpack according to claim 29 wherein the odor  
2 absorbing agent is activated carbon.

1           31. A backpack according to claim 30 wherein the base layer has  
2 an outer surface and further comprising a camouflage color scheme  
3 provided on the outer surface of the base layer, the camouflage color  
4 scheme intended to reduce the chances of visible detection of the  
5 backpack by wildlife.

1           32. A backpack according to claim 30 wherein the base layer has  
2 an outer surface and further comprising a highly visible color scheme  
3 provided on the outer surface of the base layer, the highly visible color  
4 scheme intended to increase the chances of visible detection of the  
5 backpack by humans.

1           33. A backpack according to claim 30 wherein the activated  
2 carbon is provided in the range of 5 g/m<sup>2</sup> to 120 g/m<sup>2</sup>.

1           34. A backpack according to claim 30 wherein the activated  
2 carbon is impregnated in the base layer.

1           35. A storage device according to claim 30 and further  
2 comprising an outer layer mounted to the base layer.

1           36. A backpack according to claim 30 wherein the base layer has  
2 an inner surface and the outer layer has an outer surface, the activated  
3 carbon being provided intermediate the inner surface and the outer  
4 surface.

1           37. A backpack according to claim 35 and further comprising a  
2 camouflage color scheme provided on the outer surface of the outer layer,  
3 the camouflage color scheme intended to reduce the chances of visible  
4 detection of the backpack by wildlife.

1           38. A backpack according to claim 35 and further comprising a  
2 highly visible color scheme provided on the outer surface of the outer  
3 layer, the highly visible color scheme intended to increase the chances of  
4 visible detection of the backpack by humans.

1           39. A fanny pack intended for storage of articles comprising a  
2 base layer incorporating an odor absorbing agent provided for absorbing  
3 odors of the articles stored in the fanny pack.

1           40. A fanny pack according to claim 39 wherein the odor  
2 absorbing agent is activated carbon.

1           41. A fanny pack according to claim 40 wherein the base layer  
2 has an outer surface and further comprising a camouflage color scheme  
3 provided on the outer surface of the base layer, the camouflage color  
4 scheme intended to reduce the chances of visible detection of the fanny  
5 pack by wildlife.

1           42. A fanny pack according to claim 40 wherein the base layer  
2 has an outer surface and further comprising a highly visible color scheme  
3 provided on the outer surface of the base layer, the highly visible color  
4 scheme intended to increase the chances of visible detection of the fanny  
5 pack by humans.

1           43. A fanny pack according to claim 40 wherein the activated  
2 carbon is provided in the range of 5 g/m<sup>2</sup> to 120 g/m<sup>2</sup>.

1           44. A fanny pack according to claim 40 wherein the activated  
2 carbon is impregnated in the base layer.

1           45. A fanny pack according to claim 40 and further comprising  
2 an outer layer mounted to the base layer.

1           46. A fanny pack according to claim 45 wherein the base layer  
2 has an inner surface and the outer layer has an outer surface, the  
3 activated carbon being provided intermediate the inner surface and the  
4 outer surface.

1           47. A fanny pack according to claim 46 and further comprising a  
2 camouflage color scheme provided on the outer surface of the outer layer,  
3 the camouflage color scheme intended to reduce the chances of visible  
4 detection of the fanny pack by wildlife.

1           48. A fanny pack according to claim 46 and further comprising a  
2 highly visible color scheme provided on the outer surface of the outer  
3 layer, the highly visible color scheme intended to increase the chances of  
4 visible detection of the fanny pack by humans.

1           49. An accessory storage device for storing hunting articles  
2 comprising: a base layer incorporating activated carbon wherein the  
3 carbon absorbs odors of the articles stored inside the accessory storage  
4 device thereby reducing the chance that the articles will be detected by  
5 the sense of smell of wildlife.

1           50. An accessory storage device according to claim 49 wherein  
2 the base layer is air permeable.

1           51. An accessory storage device according to claim 49 wherein  
2 the base layer has an outer surface and further comprising a camouflage  
3 color scheme provided on the outer surface of the base layer, the  
4 camouflage color scheme intended to reduce the chances of visible  
5 detection of the accessory storage device by wildlife.

1           52. An accessory storage device according to claim 49 wherein  
2 the base layer has an outer surface and further comprising a highly visible

3 color scheme provided on the outer surface of the base layer, the highly  
4 visible color scheme intended to increase the chances of visible detection  
5 of the accessory storage device by humans.

1 53. An accessory storage device according to claim 49 wherein  
2 the activated carbon is provided in the range of 5 g/m<sup>2</sup> to 120 g/m<sup>2</sup>.

1 54. An accessory storage device according to claim 49 wherein  
2 the activated carbon is impregnated in the base layer.

1 55. An accessory storage device according to claim 49 and  
2 further comprising an outer layer mounted to the base layer.

1 56. An accessory storage device according to claim 55 wherein  
2 the base layer has an inner surface and the outer layer has an outer  
3 surface, the activated carbon being provided intermediate the inner  
4 surface and the outer surface.

1 57. An accessory storage device according to claim 56 and  
2 further comprising a camouflage color scheme provided on the outer  
3 surface of the outer layer, the camouflage color scheme intended to  
4 reduce the chances of visible detection of the accessory storage device  
5 by wildlife.

1 58. An accessory storage device according to claim 56 and  
2 further comprising a highly visible color scheme provided on the outer  
3 surface of the outer layer, the highly visible color scheme intended to  
4 increase the chances of visible detection of the accessory storage device  
5 by humans.

1 59. An accessory storage device according to claim 49 wherein  
2 the base layer has an inner surface and an outer surface, the activated

3 carbon being provided intermediate the inner surface and the outer  
4 surface.

1 60. An accessory storage device according to claim 59 and  
2 further comprising a camouflage color scheme provided on the outer  
3 surface of the base layer, the camouflage color scheme intended to  
4 reduce the chances of visible detection of the accessory storage device  
5 by wildlife.

1 61. An accessory storage device according to claim 59 and  
2 further comprising a highly visible color scheme provided on the outer  
3 surface of the base layer, the highly visible color scheme intended to  
4 increase the chances of visible detection of the accessory storage device  
5 by humans.
